

HOW TO APPLY YOUR PAINTMASK STENCIL

A SIMPLE FIVE-STEP APPLICATION GUIDE

Follow these five steps to apply your Paintmask stencil.

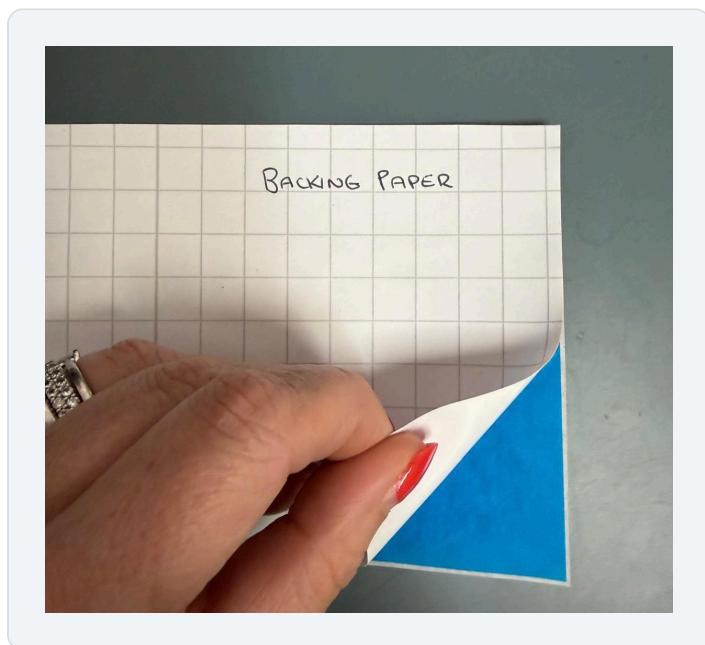

**Your paint mask stencil will
have transfer paper on top
and backing paper on the
back**

1. Turn the stencil over

Place the stencil face down with the backing paper facing upwards.

2. Remove the backing paper

Carefully peel the backing paper away, exposing the adhesive side of the blue Paintmask.

3. Position the stencil on the surface and squeegee firmly

Place the Paintmask onto your clean, dry surface and using the squeegee, firmly press over the application paper so the blue stencil adheres to the surface.

4. Peel away the application paper

Slowly peel the application paper away, making sure the blue Paintmask remains attached.

5. Your stencil is ready to be painted!

Read our 'How to paint your stencil for best results' guide.
